

LET'S TURN THE
ENVIRONMENT INTO A

**NATIONAL
PRIORITY!**

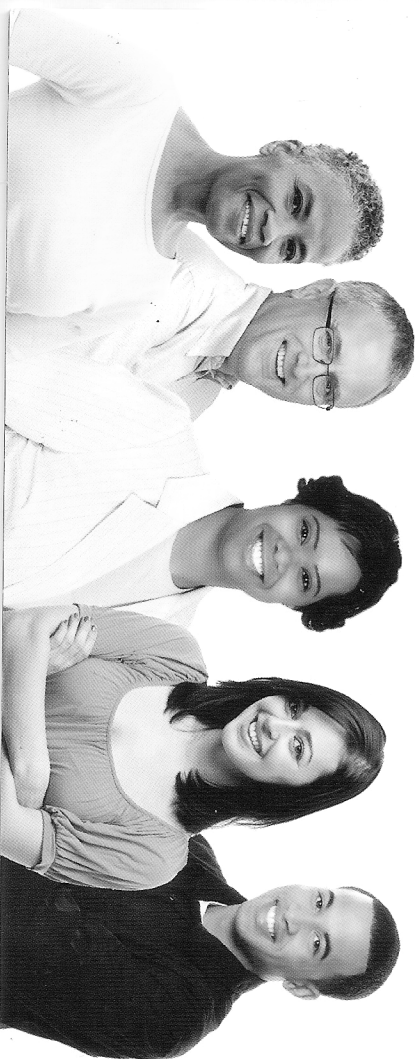

**CLIMATE
ACTION**
NORTH CAROLINA
ACT TODAY SAVE TOMORROW

OFFICE OF CONSERVATION VOTERS

ABOUT THE LEAGUE OF CONSERVATION VOTERS

The League of Conservation Voters advocates for strong environmental policies and helps elect environmental champions at every level of government. We've made huge progress in building a clean energy economy, but more needs to be done and we need your help if we're going to protect the planet from the growing threat of climate change.

The League of Conservation Voters is:

- ▶ Marginalizing extreme climate change deniers.
- ▶ Helping to elect dozens of new climate champions at every level of government.
- ▶ Activating a diverse group of engaged citizens to speak out on climate change.

NORTH CAROLINA NEEDS YOU!

*North Carolina needs your support
in the fight against a new breed
of climate deniers growing in our
own backyard.*

We Need Your Help to Fight Against:

- ▶ State and federal efforts to block action on climate change.
- ▶ Out-of-state garbage flowing into our landfills.
- ▶ Unregulated fracking that could poison our drinking water.

Join us today to stand
up and fight to protect
our planet and ensure
access to clean air
and water for future
generations!

IT'S TIME TO ACT ON CLIMATE

Carbon pollution from power plants fuels climate change and threatens the health of all Americans. Left unchecked, the increased temperatures and smog resulting from climate change triggers more asthma attacks in children and seniors, as well as increasing other public health risks.

That's why I strongly support the EPA's effort to limit carbon pollution from all power plants. These new clean air standards will protect public health, fight climate change, and create jobs through innovation in cleaner, safer energy technology.

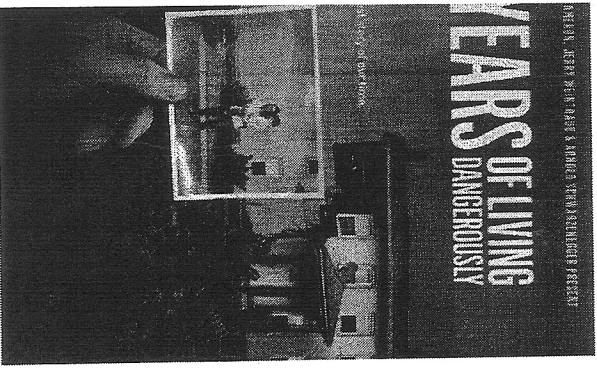

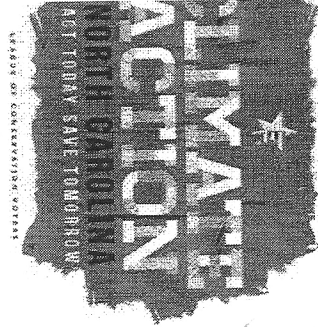

It's our obligation to protect our children and future generations from the effects of climate change.

By taking this action, you are affirming your membership in the League of Conservation Voters and the North Carolina League of Conservation Voters and will receive regular LCV and NCLCV communications including text messages, and are entitled to vote for a member of the LCV Board of Directors.

Dear Editor,

The debate over the science of climate change is over. It's happening and we know that carbon pollution is the leading cause. I'm glad the Administration and a growing list of members of Congress are serious about lowering our carbon emissions and moving us towards a clean energy future.

We have the tools to address climate change, but the biggest roadblock to moving forward is opposition and obstruction from big polluters who have launched campaigns and padded the pockets of climate deniers in Congress to protect their own profits instead of public health.

I'm thankful for members of congress like Rep. Bruce Braley in Iowa, Sen. Susan Collins in Maine, Rep. Gary Peters in Michigan, and Sen. Kay Hagan in North Carolina who have all taken a stand in support of clean energy, jobs and clean air policies that protect public health.

Sincerely,

Signature _____
