Hello Friends!

I am so happy and proud to announce that with the collaboration of our fellow PACE organizations, and community partners, North Carolina has finally completed it's video snapshot of PACE in North Carolina. We are so proud of the service we are providing for thousands in North Carolina and want to ensure we can continue to be a reliable resource for our aging population wanting to live the best quality of life possible in their home of choice; despite nursing home level of care and financial barriers.

Please take a minute to check out and share with your friends and family our model of care not only in the words of our participants, but also from our amazing community partners like Gentiva Home Health (Kindred At Home) in Charlotte, NC.

please visit....

On the NC home page at ncpace.org

or

<https://www.youtube.com/watch?v=FKa4KNUkvg8>

If you are interested in learning more about our program or have someone in need I am always available. Please feel free to share my direct contact information or complete and send in the referral form below so we can continue helping our seniors age in place with those they love.

Thank you again for all of your continued support!
